START

Start allows you to maximize your space and your budget, offering the best combination of design, quality and price. Thanks to minimal components, Start is easy to install. It is also easy to expand, allowing for a large number of combinations to meet any space-planning need with customized configurations and high aesthetic value.

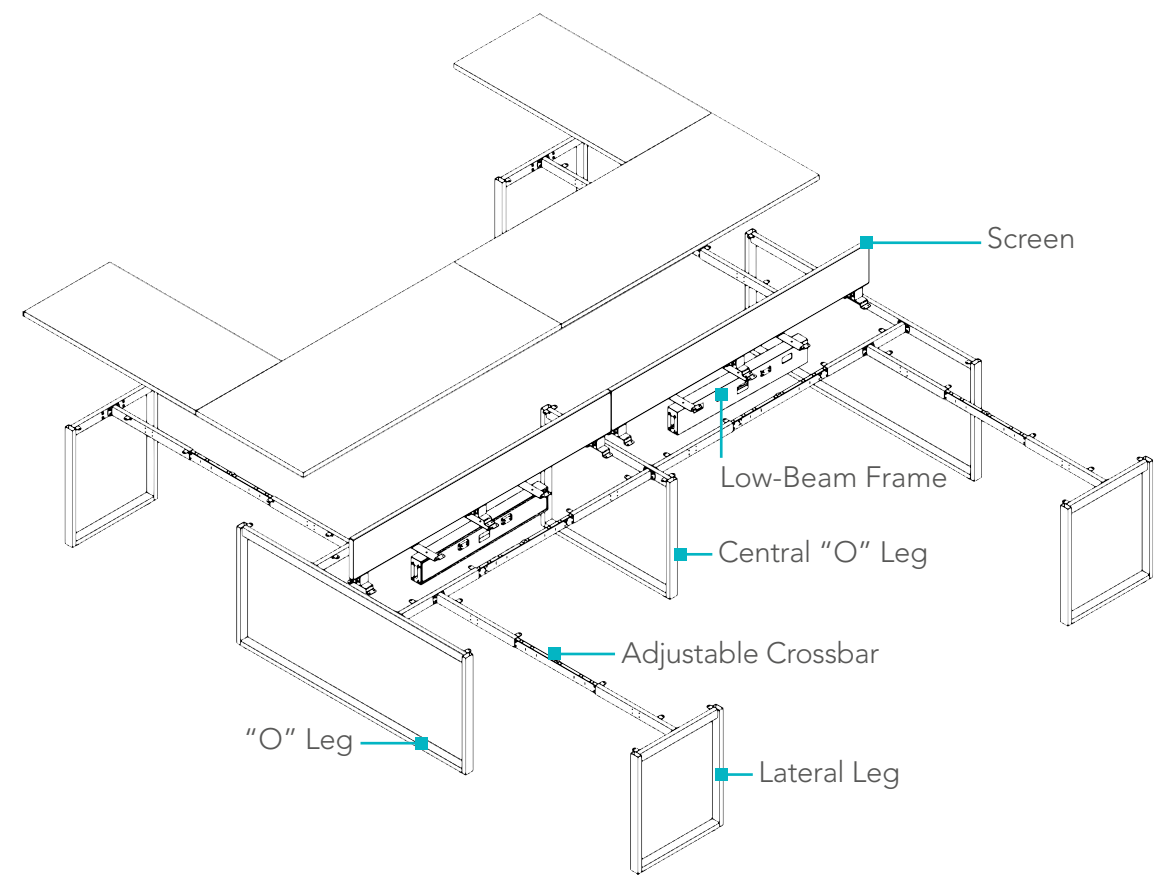

Optimize and save space with the strategic positioning of surfaces and bases as you elevate the functionality of each work area with accessories to enhance your work experience.

SINGLE RUN

Optimize space in linear configuration with a single run system that offers hidden electrical access for voice and data.

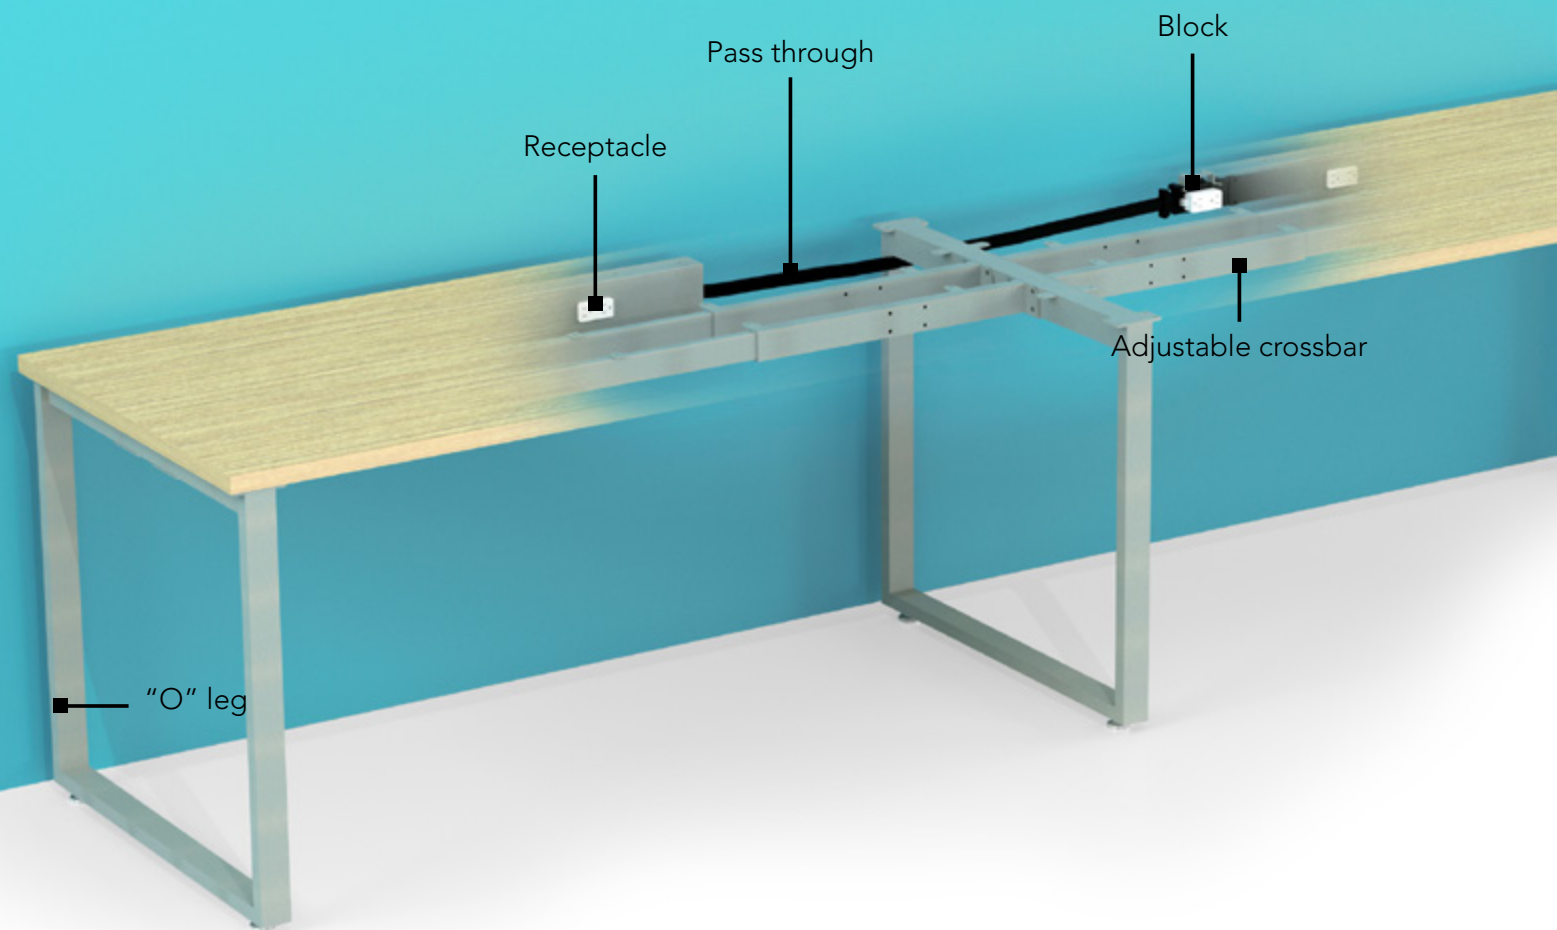

DOUBLE RUN

Start is perfect for the optimization and expansion of space and resources in offices with large work teams. With benching and double run systems, each workstation can adapt to technology demands with electrical access to voice and data in both directions.

THE KEY TO ADAPTABILITY

Thanks to the flexibility of Start, adapting to change is easier than ever.

Optimize responsiveness to changes in configurations. Go from a single run to a double run system to accommodate increases in work staff and the overall growth of your organization.

Adapt basic workstations to benching with a quick change of covers and repositioning of the adjustable crossbar. Add bases to increase the number of stations.

BASE

Adapt your work area's dimensions and design with Start's various base options, including central, "O" and side legs, along with adjustable crossbar, ducts and gutters. For metal body colors, choose among black, white, textured aluminum and RM Gray.

ADJUSTABLE CROSSBAR

Base finishes:
Black, White, RM Gray,
Textured Aluminum

Height (with top):
30"

Adjustable crossbar:
For configurations from 48°
to 72°

Warranty:
10 years

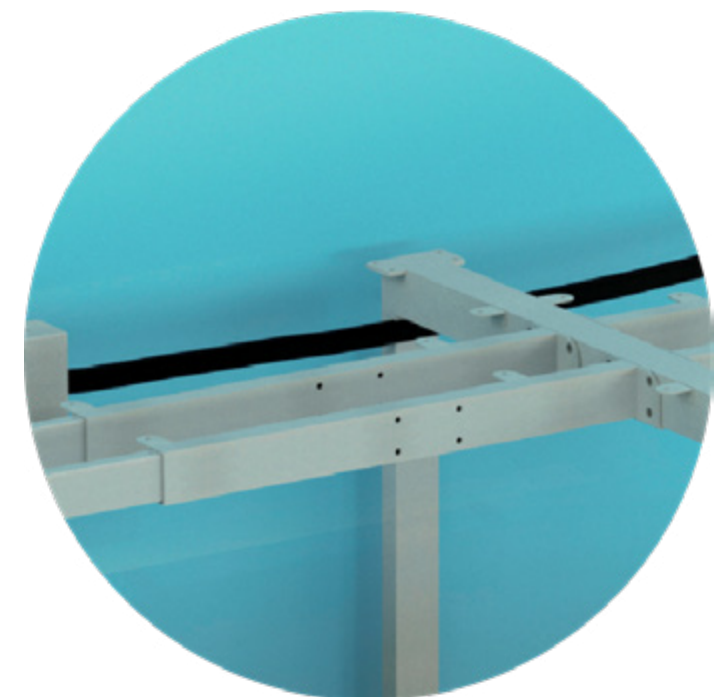

Electrification:
Optional

Work surface widths:
48", 60", 66" and 72"

Work surface depths:
24" and 30"

ADJUSTABLE CROSSBAR

The adjustable crossbar lends stability to your furniture and reinforces the cover. It can expand to the size of the stringer, thanks to a design that opens and closes as needed.

BEAM

Beam Power & Data Distribution System

Beam's flexible design keeps cables hidden, providing electrification in each station through knockouts, harnesses and ducts under covers. Choose the Beam benching version for double run configurations with users on both sides or single run for individual stations.
