Gebesa | CREATING AMAZING SPACES

SYNERGY

SYNERGY

The basis of Synergy is upholstered or laminated monolithic panels, which create functional spaces with a simple, acoustic solution. Easy to assemble and with wire management capabilities, this collection inspires productivity and efficiency.

Synergy provides quick response to the specific needs of dynamic workplaces without compromising functionality and image—along with a wide variety of accessories to equip and customize your workstations.

STRUCTURE
SYNERGY

MDF

Fabric or Thermally Fused laminate (TFL)

Knockout cover

Metal top cap

Wedge blocks

Metal side frame

Acoustic panel (Honeycomb)

Power & Data raceway

Metal kickplate

Furniture color may vary from renderings.
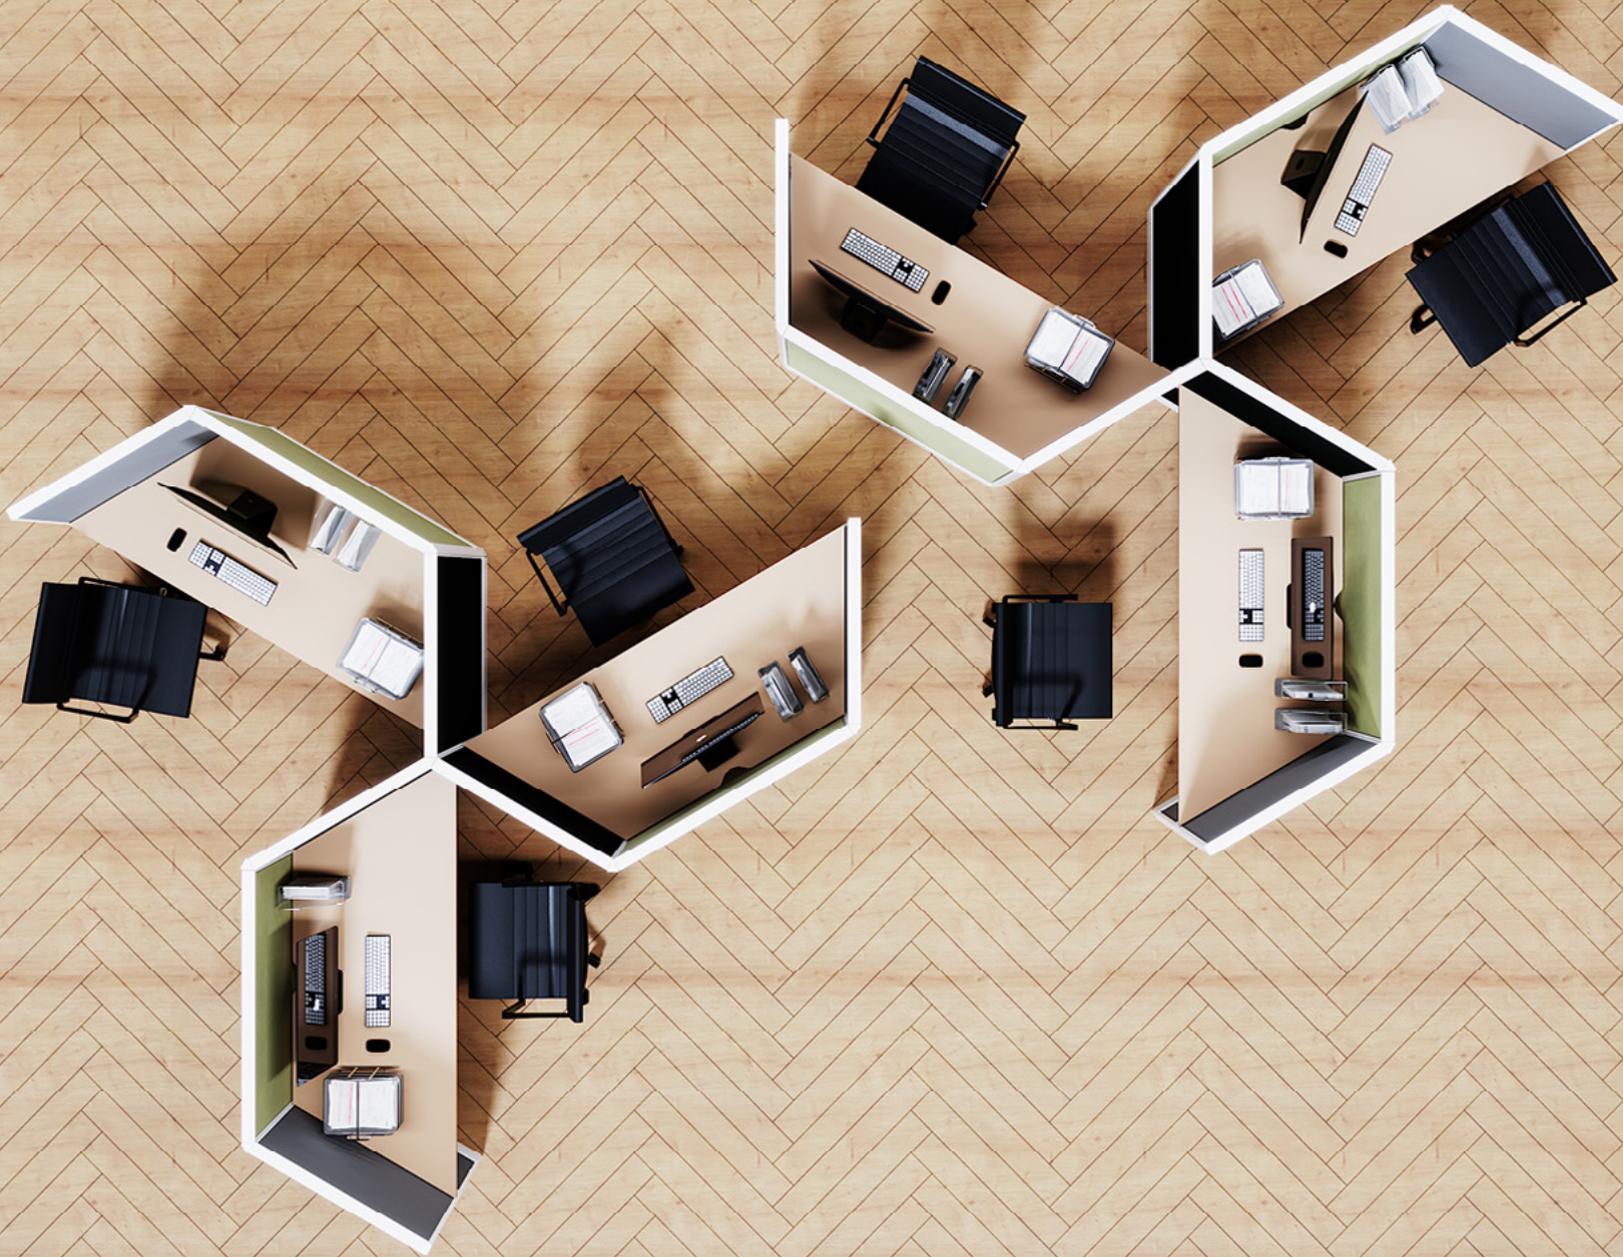

Furniture color may vary from renderings.

Panels

The design of the Synergy panels creates a uniform and elegant finish. It has a thickness of 2". Choose fabric or low-pressure finishes.

Adapt the workstations according to your needs with the different measures available, ranging from 35" to 85" in height and 18" to 60" in width.

Monolithic

Mixed

SYNERGY

Make it your own

Optimize the functions of your workstation based on modular systems with panel connectors. Adapt the length to the height of your panel, which measures 2x2". Install between panels whenever your design requires a change of direction.
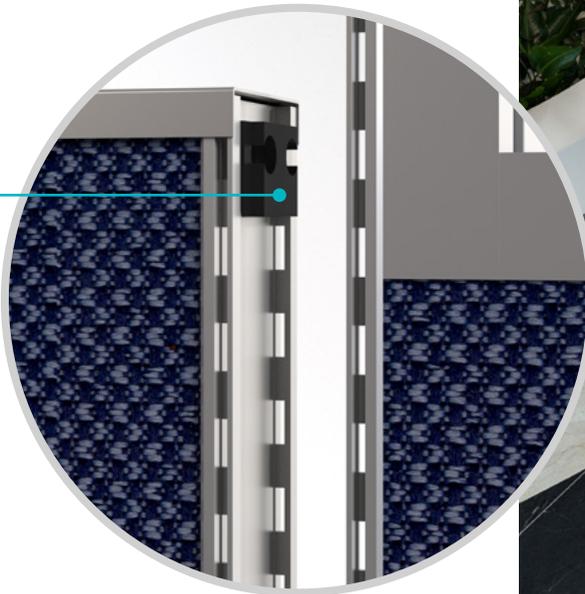

The metal finishing caps of the Synergy line, designed to be placed on the final panel of your configuration, guarantee an optimal aesthetic by closing the metal structure that allows the joints to use wedges, leaving its interior hidden.

A world of possibilities!

Thanks to the wedge blocks, keep each panel attached and select how the panels coexist, making the most of the spaces.

Choose the finishes and dimensions of your modular system, make the most of its power source at the bottom, and create a space fully adapted to the needs of your office.

Wedge Blocks

Furniture color may vary from renderings.

A NEW LEVEL OF PERSONALIZATION OF SPACES!

Gallery Panels are an affordable, elegant, and practical way to incorporate separation and privacy into your panel system configuration. Customize your environment with a wide variety of low-pressure finishes.

Our Gallery Panels can be attached to create divisions, through junctions with the panels, or at the end of a configuration - redefines the boundaries of a workspace.

Wall mount

MOUNTING TILES
SYNERGY

TACKABLE MOUNTING TILE

Solve task organization needs in your modular system. Install our puncturable panel and optimize space by placing it directly on the screen.

WHITEBOARD MOUNTING TILE

Install our paint patch on the screens of your Synergy modular system and exchange ideas between collaborators and write down notes, issues or info.

MOUNTING TILE

Create an optimal base for other accessories to be fastened such as a vase holder or pen. Our panel achieves the right conditions for all elements to have their place.

COLLAB. TABLES
SYNERGY

Bullet Table

Boat Table

Rectangular Table

Bulb Table
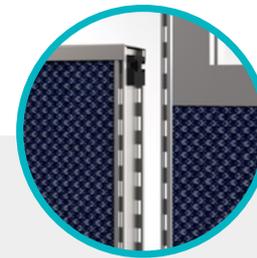

Can be used with Panel Systems

Collaborative Tables bring elegance to any space. Position your way from boardrooms and offices to training and break rooms.

Mix and match with Synergy Panels to create the ultimate ergonomic and collaborative work environment.

GUIDELINES

Fabrics that are **patterned, textured, or have sheen can have a distinctly different appearance if applied in different directions on chairs or panels**. Because of these differences, as well as width limits to how some fabrics can be applied to Gebesa products*, it is important to understand fabric applications.

55"

55"
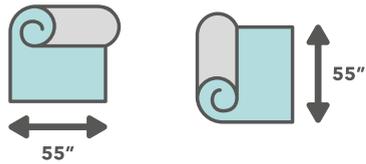

Fabrics **cannot be applied warp horizontal/railroaded** on panels with a **height greater than 48 inches** because panel height is greater than fabric width.

Warp Direction

55" Fabric Width

Warp Horizontal
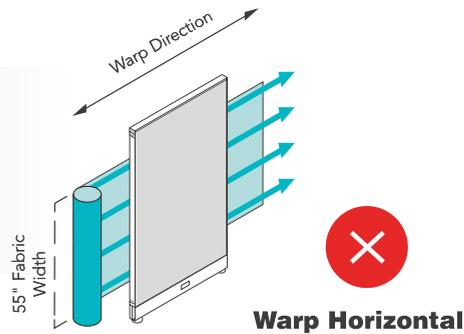

Fabrics **cannot be applied warp vertical** on panels with a **width greater than 48 inches** because panel width is greater than fabric width.

55" Fabric Width

Warp Direction
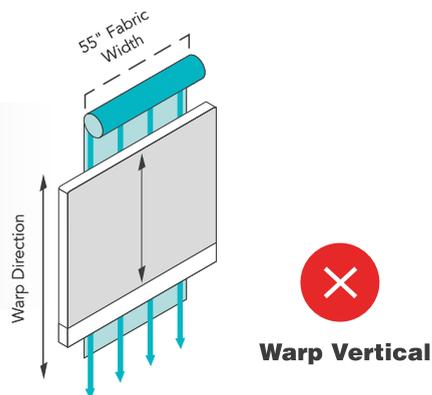

Warp Vertical

Gebesa is not responsible for charges associated with replacement or reupholstering of products due to incorrect fabric specifications.
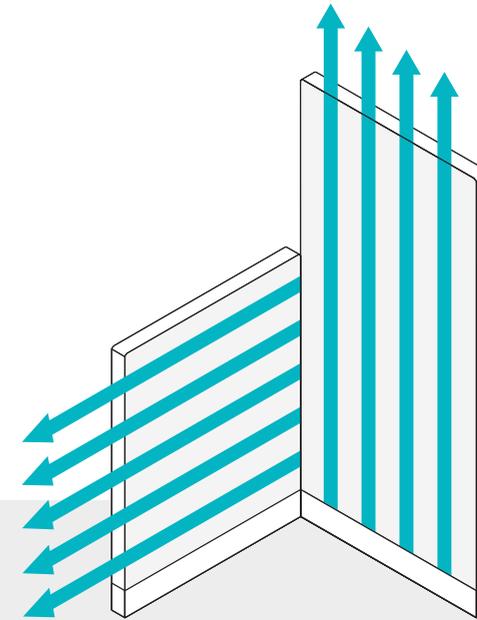

The combination of tall panels (height of 55 inches or more with warp vertical/off the roll) with short panels (height of 45 inches or less with warp horizontal) results in fabric patterns running in opposite directions.

The following options are available:

• Use solid or non-directional fabrics.
  (Various Gebesa fabrics are noted as "non-directional.")

• Specify warp vertical/off the roll application for fabrics that are standard warp horizontal.

If you require warp vertical and it is not standard for your fabric choice, you must specify the warp vertical option on each line of the order.

Gebesa
